Embedded Software Developer

Advancing Intelligent Systems with Expertise in Real-Time Systems and Scalable Software Architectures

Experienced Software Engineer with 10+ years of experience in Linux-based development, C++ programming and simulation tool development. Specialized in physics based simulation, object-oriented programming (OOP), and scalable software architectures. Strong background in safety critical systems and software validation, with a proven track record of leading international, cross-functional teams.

- ✓ **Led development of real-time capable software** (300+ users) using agile method and OOP with C++17.
- ✓ **Integrated real-time models into a complex ROS2 project** for V&V, ensuring ISO-26262 compliance.
- ✓ **Proficient in Git, DevOps and containerization tools** for scalable and maintainable software solutions.
- ✓ **Accelerated feature delivery by 60%** through software best practices and process optimization.
- ✓ **Mathematical modeling and simulation** of electromechanical components of an autonomous vehicle.

TECHNOLOGIES & TOOLS

Languages: C/C++, Python, BASH, MATLAB
Simulation: Simulink, CarMaker
Operating systems: Linux (Debian/Ubuntu), Windows
Linear algebra libraries: PETSc, EIGEN
DevOps Tools: Git, Docker, Jenkins, GitHub actions
Testing frameworks: pytest, Google test
Middleware & Network: ROS2, TCP/IP, OSI, CAN
Debuggers/Profilers: `gdb`, `calgrind`, Intel VTune
Build Systems CMake, Bazel
Standards: ISO-26262

PROFESSIONAL EXPERIENCE

Torc Europe GmbH, Stuttgart, Germany **04/2023 - present**

Staff Software Engineer

Led development of highly-scalable software tools in C++17 using OOP and CI/CD methodologies.

Reported to: Director, Simulation **Direct reports:** 1 Staff, 2 Senior Engineers and 2 Interns

- Engineered digital twins of mechatronic systems using model-oriented SW design to accelerate feature delivery.
- Collaborated with cross-functional teams to develop ISO-26262 compliant integration and validation strategies.
- Delivered real-time capable vehicle models for HiL test benches, enabling rigorous embedded hardware testing.
- Led collaborative design and development of a cutting-edge integration-test-platform for models in Python.
- Auto-generated documentation, including UML diagrams from code based on Git-events.

Daimler Truck AG, Stuttgart, Germany **08/2021 - 03/2023**

Vehicle Model Engineer

Developed multi-fidelity vehicle models using MATLAB/Simulink and C++14.

Reported to: Product Owner, Simulation **Direct reports:** 1 Senior Engineer and 2 Interns

- Developed multi-fidelity vehicle models in MATLAB/Simulink, to enable tuning of controller parameters.
- Implemented a TCP/IP co-simulation interface in C++ to integrate high-fidelity truck models, including CAN bus simulations, with AD stack, showcasing expertise in system integration and networking.
- Developed diagnostic and debugging workflows using packet sniffers such as Wireshark and python scripting.

University of Stuttgart, Germany **05/2016 - 04/2021**

Academic Researcher

Academic Researcher in Particle Dynamics, Software Development, and Experimental Mechanics.

- Conducted experiments and simulations to determine the optimal particle shape for enhanced dissipation, using CAD/3D printing technology for validation.
- Planning and execution of measurement campaigns of virbational structures using Laser-Doppler Vibrometry.
- Developed a Hall-effect sensor-based linear position measurement system on an Arduino embedded platform.

EDUCATION

Ph.D. in Mechanical Engineering, University of Stuttgart, 2021
Grade: Magna Cum Laude | ***Thesis***: Particle Dampers - Enhancing Energy Dissipation using Fluid/Solid Interactions and Rigid Obstacle-Grids.

M.Sc. in Commercial Vehicle Technology, Technical University of Kaiserslautern, 2016
Grade: 1.9 | ***Focus***: Automotive Software Engineering, Embedded Systems, Real-Time Systems and Simulation.

B.Eng. in Production Engineering, Anna University, Chennai, India, 2012
Grade: 8.3/10 (equivalent to a German grade of 1.3)

AWARDS & HONOURS

Best Presentation Award 2015
An adaptive approach to real-time estimation of vehicle dynamics parameters using kalman filtering.

Best Presentation Award 2014
Optimization of vehicle parameters based on lap-time simulations using multi-objective evoluation algorithm.

CERTIFICATION & PROFESSIONAL DEVELOPMENT

Demonstrated cross-cultural team leadership | Implemented ISO-26262 functional safety requirements.

LANGUAGES

English (Proficient) | German (Proficient) | Tamil (Native) | Hindi (Advanced)

ADDITIONAL PROJECTS

Custom PCB for Bluetooth Remote – DIY Electric Skateboard **2023**

- ✓ Designed and built a custom PCB for a Bluetooth remote to control a self-built electric skateboard.

Raspberry Pi Powered Smart-Home Network **2020**

- ✓ Built a versatile Raspberry-Pi smart home network with remote-access, custom file storage server with automatic backups using rsync, Zigbee2Mqtt server for controlling IOT devices using siri/google-nest and custom automations.

Machine Learing Suite **2015**

- ✓ Implement a deep convolution neural network for optical character recognition as part of a freelance software project in MATLAB. Used MEX API to increase performance.

Driver-in-the-Loop Simulator **2014**

- ✓ Implemented a driver-in-the-loop simulator by coupling IPG CarMaker and MATLAB/Simulink.
